SUMMARY

Three years of experience, the last two building interfaces with React and TypeScript in production. I work the front end against REST APIs I also write, so I discuss the data contract before the problem reaches the screen. At Grupo DELSUD I was the technical reference for a team of 5 and took a full management system to production; in parallel I am tech lead of a B2B professional network as a freelancer, where I also build the front end and the design system.

EXPERIENCE

Full-Stack Developer — Grupo DELSUD

Jan 2026 — Present · La Plata, Argentina

- Desarrollos Del Sud: took the platform for selling plots in instalments to production (CRM, Management System and a public website in Next.js), delivered in August 2026.
- Built the Management System end to end, with 20 functional modules (contracts, collections, cash flow, inflation indexing, reporting): the React screens on Material UI and Sass, and the API that feeds them.
- Interfaces against my own REST APIs: writing both sides, I defined the data contract the screen needed instead of adapting to someone else's.
- Was the technical reference for a team of 5 (2 devs, UX, QA, PM): set the code standards and took part in the key technical decisions together with the tech lead.
- Closed around 65% of the team's tickets each sprint, consistently assigned the most technically complex ones.
- On the data side: connected the existing CRM (Sequelize) with the new system (Drizzle) with two-way sync, role-based access control (RBAC) and fixes for race conditions on concurrent writes.
- Currently on SGD, the group's internal system, I build with React 19 the Directions ERP and the Product and Technology task board (micro-frontends embedded through iframes, talking over postMessage), taking QA reports through to verified fixes in the app.

Stack: React · Next.js · TypeScript · Material UI · Sass · Node.js · Express.js · PostgreSQL · MySQL · Socket.io

Full-Stack Developer and Tech Lead (Freelance) — 2winGs International Group LLC

Aug 2026 — Present · Remote

- Front end in React + Vite + TypeScript with Tailwind: first stage delivered end to end (sign-up, sign-in, email verification and password recovery) with all its screens.
- Own design system: tokens named by function in a single file, mobile-first and with accessibility criteria, ready to take on the brand identity once the client defines it.
- Static front end deployed on Cloudflare Pages, with the build always outside the production machine.
- Designed the architecture and build order of the product, from the data model to the API contract, written down before any code.
- Technical counterpart for the client: turned three product documents that contradicted each other into a hierarchy of sources of truth, which the client adopted as its decision criterion.

Stack: React · Vite · TypeScript · Tailwind CSS · NestJS · Fastify · PostgreSQL · Drizzle · Redis · Cloudflare Pages

Full-Stack Developer — Cognitive Link — Consulting & IT Solutions

Mar 2025 — May 2026 · La Plata, Argentina

- Built a multi-tenant SaaS platform from scratch (retail and clinical) with Next.js 14, TypeScript and Tailwind CSS, with per-client data isolation and role-based access control.
- User-facing integrations: the Mercado Pago SDK for payments and the Google Calendar API (OAuth 2.0) for automatic appointment handling.
- Scheduled jobs for automatic notifications and reminders, and continuous deployment on Vercel managed autonomously.

Stack: Next.js 14 · Node.js · TypeScript · PostgreSQL · Supabase · Tailwind CSS

Full-Stack Developer (Freelance) — Cicaré

Mar 2025 — Aug 2025 · Saladillo, Argentina

- Technical documentation platform with Next.js and Tailwind CSS: hierarchical content structure with advanced, customisable search filters.
- Interface work aimed at faster navigation across a large volume of documents, and automation of the key notifications.
- Authentication, permissions and administrative approval flows over confidential information.

Stack: Next.js · Node.js · PostgreSQL · Supabase · Tailwind CSS

Full-Stack Developer — Felanix Construcciones

Sep 2023 — Sep 2024 · La Plata, Argentina

- Cut task processing time by 20% by automating key processes of a construction management system.
- Developed the core business logic and the system's views, working with Scrum to coordinate timelines and requirements.

Stack: Ruby on Rails · Active Record · PostgreSQL · Docker · JavaScript · Bootstrap

EDUCATION

Bachelor's Degree in Systems — Universidad Nacional de La Plata (UNLP) · Dec 2023 — Present

Courses

- React Front-end Development Track — Coderhouse (Feb.–Jul. 2023)
- Java OOP Bootcamp — Alkemy (Apr. 2024)
- GNU/Linux Server Administration (Security) — Buenos Aires Ministry of Education (Dec. 2023)
- Database Administration (MySQL) — Buenos Aires Ministry of Education (Nov. 2023)
- Professional Ruby on Rails Course — Código Facilito (Nov. 2023)
- Git and GitHub — Alura Latam (Apr. 2023)

SKILLS

Front-end

React · Next.js · TypeScript · JavaScript · Tailwind CSS · Material UI · Sass · Bootstrap · PWA

Back-end

Node.js · Express.js · NestJS · Ruby on Rails · Python

Architecture

Dual-DB · RBAC · Migrations · Clean Code

Integration and teamwork

REST APIs · Git · GitHub · Postman · Vitest · Scrum

Databases

PostgreSQL · MySQL · SQLite · Redis · Supabase

Infrastructure

Docker · PM2 · Vercel · Cloudflare Pages · Amazon S3 · Cloudflare R2

LANGUAGES

Spanish — Native · English — Intermediate (B1) — daily technical reading and writing

SOFT SKILLS

Analytical thinking · Clear communication · Teamwork · Adaptability · Initiative
