SUMMARY

Three years of experience building APIs and data systems in production with Node.js and TypeScript, focused on architecture and data integrity. At Grupo DELSUD I was the technical reference for a team of 5 and took to production an administrative and accounting management system connected to an existing CRM through a dual-database architecture. In parallel, tech lead of 2winGs, a B2B platform I build end to end: API, infrastructure and security.

EXPERIENCE

Full-Stack Developer — Grupo DELSUD

Jan 2026 — Present · La Plata, Argentina

- Desarrollos Del Sud: took the platform for selling plots in instalments to production (CRM, Management System and public website), delivered in August 2026.
- Designed the architecture of the Management System from scratch, with 20 functional modules (contracts, collections, cash flow, inflation indexing, reporting, among others).
- Dual-database architecture: connected the existing CRM (Sequelize, ~25 models) with the new Management System (Drizzle ORM), with automatic two-way data synchronisation.
- Fixed critical data-integrity bugs, including race conditions on concurrent record creation and on the synchronisation between systems.
- Access control (RBAC): token verification and role authorisation middlewares, protecting every endpoint according to the user profile.
- Cleaned up the inherited CRM code so it could be reused in a new product: SQL queries (N+1 and selects without a field list), environment variables, unused dependencies and dead code.
- Was the technical reference for a team of 5 (2 devs, UX, QA, PM): set the code standards and took part in the key technical decisions together with the tech lead.
- Currently on SGD, the group's internal management system: Node/PostgreSQL microservices, one per department, with real-time notifications over WebSocket.
- There I built the workday time-tracking module end to end: 14 endpoints and an immutable append-only log on the backend, with role-based permissions and live updates over sockets; I also work on indexing the heaviest queries.

Stack: Node.js · TypeScript · Express.js · MySQL · PostgreSQL · Sequelize · Drizzle · Socket.io · Amazon S3 · React · Trello

Full-Stack Developer and Tech Lead (Freelance) — 2winGs International Group LLC

Aug 2026 — Present · Remote

- Designed the architecture and build order of the product, from the data model to the API contract, written down as technical decisions before any code.
- API in NestJS on Fastify with Drizzle and PostgreSQL, and background jobs with BullMQ and Redis: first stage delivered end to end (sign-up, sign-in, email verification and password recovery).
- Privacy rules enforced in the data layer instead of the interface: a company reaches a full profile only for someone who applied to its opening.
- Security: private files behind short-lived signed URLs, and an operation id on every write so a retry cannot duplicate its effect.
- Plans, prices, limits, permissions and reputation index weights live in the database, with no hard-coded values.
- Infrastructure and automated deployment: API and worker live on a dedicated server under PM2, dashboard on Cloudflare Pages, and the build always outside the production machine.
- Technical and regulatory analysis of the fund custody in the roadmap: built on top of a licensed processor, with money modelled as entries that are never edited from the very first schema.

Stack: TypeScript · NestJS · Fastify · PostgreSQL · Drizzle · Redis · BullMQ · Cloudflare R2 · PM2 · React

Full-Stack Developer — Cognitive Link — Consulting & IT Solutions

Mar 2025 — May 2026 · La Plata, Argentina

- Built a multi-tenant SaaS platform from scratch (retail and clinical), extending the base relational model to more than 24 tables with safe per-client data isolation and role-based access control.
- Integrations with the Mercado Pago SDK and the Google Calendar API (OAuth 2.0) for automatic appointment and payment handling.
- Scheduled jobs (cron) to send notifications and reminders to users automatically.
- Continuous deployment: autonomous setup and management of the production environments on Vercel.

Stack: Next.js 14 · Node.js · TypeScript · PostgreSQL · Supabase · Tailwind CSS

Full-Stack Developer (Freelance) — Cicaré

Mar 2025 — Aug 2025 · Saladillo, Argentina

- Design and implementation of a scalable architecture with authentication and permission management for a platform holding confidential information.
- End-to-end full stack: persistence on Supabase, endpoints and administrative approval flows.
- Hierarchical content structure with advanced, customisable search filters.
- Automation of key notifications and interface work for faster navigation.

Stack: Next.js · Node.js · PostgreSQL · Supabase · Tailwind CSS

Full-Stack Developer — Felanix Construcciones

Sep 2023 — Sep 2024 · La Plata, Argentina

- Cut task processing time by 20% by automating key processes of a construction management system.
- Developed the core business logic, applying Scrum to coordinate timelines and requirements.
- Managed timelines and requirements, keeping the project on schedule.
- Full technical support: hardware and software incidents to keep operations running.

Stack: Ruby on Rails · Active Record · PostgreSQL · Docker · JavaScript · Bootstrap · Trello

EDUCATION

Bachelor's Degree in Systems — Universidad Nacional de La Plata (UNLP) · Dec 2023 — Present

Courses

- Database Administration (MySQL) — Buenos Aires Ministry of Education (Nov. 2023)
- GNU/Linux Server Administration (Security) — Buenos Aires Ministry of Education (Dec. 2023)
- Professional Ruby on Rails Course — Código Facilito (Nov. 2023)
- Java OOP Bootcamp — Alkemy (Apr. 2024)
- React Front-end Development Track — Coderhouse (Feb.–Jul. 2023)
- Git and GitHub — Alura Latam (Apr. 2023)

SKILLS

Back-end

Node.js · TypeScript · Express.js · NestJS · Fastify · Ruby on Rails · Python

Architecture

Dual-DB · REST APIs · Microservices · RBAC · Migrations · Clean Code

Front-end

React · Next.js · Tailwind CSS · Material UI

Databases

PostgreSQL · MySQL · SQLite · Redis · Supabase · Drizzle · Sequelize · Active Record

Infrastructure

Docker · PM2 · BullMQ · Vercel · Cloudflare Pages · Amazon S3 · Cloudflare R2

Tools

Git · GitHub · Trello · Postman · Vitest · DBeaver

LANGUAGES

Spanish — Native · English — Intermediate (B1) — daily technical reading and writing

SOFT SKILLS

Analytical thinking · Clear communication · Teamwork · Adaptability · Initiative
